RME TotalMix FX 2.0 Beta

The new TotalMix FX 2.0 introduces a fully scalable graphics engine for flexible zooming and resizing of mixer and matrix views and other improvements. While the core functionality remains unchanged, the fresh design replaces the old bitmap style, users can switch between old and new views anytime. Available now in beta for macOS and Windows.

Visit RME at the TMT33, November, 12th – 15th, 2025 at CCD Düsseldorf and check out the latest products and solutions. Find them at Booth 3, stop by and say hello.
