Roger Schult CoDI-MK3

With the CoDI-MK3, roger schult german audio lab sets new standards in digital audio technology. This two-channel USB audio interface impresses with its balanced XLR outputs and galvanically isolated USB connection, ensuring interference-free and low-noise signal transmission. Specifically designed for music producers, podcasters, content creators, sound engineers, streamers, and DJs, the CoDI-MK3 delivers unparalleled sound quality and maximum reliability - essential for professional use.

The technical precision of the CoDI-MK3 is demonstrated by its 16-bit digital-to-analog conversion with sampling rates up to 48kHz, as well as an exceptionally low total harmonic distortion (THD) of 0.02% at +10dBu output level. These specifications guarantee natural, distortion-free playback that meets the high demands of modern audio productions. The balanced XLR stereo outputs provide a stable, noise- and distortion-free connection to professional audio systems, while the galvanic isolation of the USB interface effectively eliminates hum and interference.

Roger Schult German Audio Lab presents the CoDI-MK3 USB Audio Interface

Saturday, 19 July 2025 11:36

"The CoDI-MK3 is a prime example of user-friendly technical innovation. It combines top audio quality with simple operation - plug & play without additional driver installation," explains Roger Schult, founder and developer at roger schult german audio lab. "You benefit from a robust, durable solution that requires no external power supply and offers maximum flexibility thanks to USB bus-powered operation."

The interface is compatible with Windows, Mac OS, and Linux (from kernel 2.6), ensuring broad usability. Handcrafted production in Germany stands for the highest quality standards and longevity.

In summary, the CoDI-MK3 offers:

- Plug & play functionality for PC, Mac, and Linux without additional drivers
- Balanced XLR stereo outputs for professional signal transmission
- Galvanically isolated USB connection for interference-free audio quality
- USB bus-powered operation without external power supply
- High-quality, durable components "Made in Germany"

The CoDI-MK3 is the ideal solution for those who value clear, dynamic, and stable audio transmission. It eliminates the typical weaknesses of standard sound cards and enables professional sound quality that you will immediately notice in your productions.

Available through specialized retailers. The price is €329.
