Slate Digital ‘VIRTU’

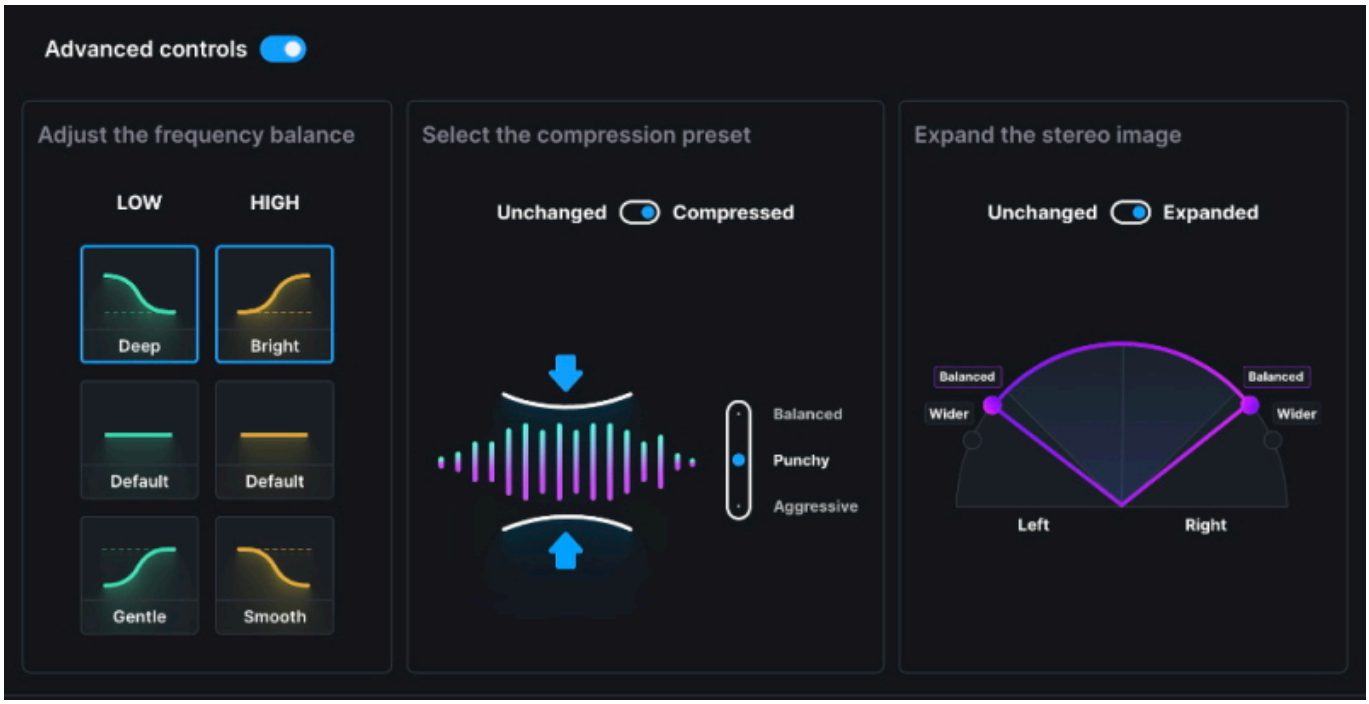

Slate Digital unveild VIRTU, a brand new web-based assisted mastering service available exclusively to All Access Pass members. Combined with beloved tools like Virtual Tape Machines, Virtual Buss Compressors, Virtual Mix Rack, and the recently released FG-X 2, VIRTU makes the All Access Pass a one-stop mixing and mastering shop for users of all experience levels.

VIRTU gives your mixes the clarity, space, and depth they need to compete with your favorite chart-topping hits. With the help of curated Style profiles and easy-to-use Advanced Controls, VIRTU takes the guesswork out of mastering. Just upload your mix, select the style that best fits your track, and pick your loudness target. You also have the option to adjust some more advanced controls, like the frequency balance, compression and stereo width of your master.

Once you’re happy with your selections, click ‘Master’ to process the entire track. Then, all that’s left to do is download your mastered song from the library, where it will stay for 30 days. These masters can be confidently distributed to streaming platforms like Spotify and Apple Music, are perfect for testing in clubs or other live settings, and make excellent references for professional mastering engineers.
