# New Bundles for the NTi Audio XL3

Three new bundles are available for the XL3 Acoustic Analyzer. Each bundle consists of a combination of firmware options (with permanent licenses), plus PC software, designed for specific applications. The combination offers an attractive price advantage, creating the ideal choice for professional XL3 users. The bundles are each tailor-made to help you get your specialized jobs done.

### Environmental Noise Bundle

The Environmental Noise Bundle is the right choice for consultants performing noise monitoring and analysis.

The bundle includes:

- Extended Noise Measurement Option (permanent)
- Data Explorer Software License (permanent)

### Sound Insulation Bundle

The Sound Insulation Bundle is a must-have for building acoustic measurements. The XL3 and PC software work seamlessly together, and help to get the job done efficiently and accurately.

The bundle includes:

- Sound Insulation Option (permanent)
- Sound Insulation Reporter Software License (permanent)

### Room Acoustics Bundle

Room acousticians will appreciate the easy-to-use reverberation time measurement process, as well as the professional reports that document and complete the work.

The bundle includes:

- Extended Room Acoustics Option (permanent)
- Room Acoustics Reporter Software License (permanent)
