# TAQSIM SOLO 3.3

TAQSIM introduces SOLO v3.3 – their most expressive and performance-ready update yet. This release brings enhanced velocity sensitivity and filter responsiveness, making SOLO feel more like a true hardware synth in your hands.

Here's What's New:

- Velocity-Responsive Filter: The filter now reacts to velocity, delivering a more dynamic and expressive playing experience - just like a hardware synth.

- Per-Oscillator Velocity Control: Customize velocity response for each oscillator individually for nuanced sound shaping.
- Dynamic Envelope Mode: A new mode that adapts envelope behavior in real time based on your playing velocity.
- Preset & Phrase Search Box: Quickly find presets and phrases with the newly added search functionality.
- Enhanced MPE Support: Improved response for MIDI Polyphonic Expression for more expressive performance.
- Enhanced Breath Controller Support: Expanded support for breath controllers offers more natural expression for wind-style play.
- Improved Glide via Velocity: Glide behavior now responds more naturally to velocity, giving you finer control over phrasing.
- Factory Sample Fixes: Resolved tuning and looping issues across factory samples and presets for better playback accuracy.
- New & Revoiced Factory Presets: New, updated and refined factory presets for improved musicality and inspiration.
- Refined UI: Cleaner interface with improved visuals and workflow enhancements.
- Faster Load Times: Launch and load projects quicker than ever before.
- Stability Enhancements: Under-the-hood improvements for a smoother, more reliable experience.
