Tone2 Audio releases the 'Synthwave' soundset for Electra

Synthwave is a collection of 140 beautiful retro-futuristic sounds, created by professional sound-designers from Orange TreeStudios.

Highlights:

- 140 Sounds
- Created by professional sound-designers from Orange TreeStudios
- Volume of all sounds have been properly normalized
- Makes use of the new features introduced with the latest version of Electra
- Minimal sample use & the patches that do have samples have been properly programmed so they are still capable of full dynamic expression & the highest possible sound quality
- All sounds have been designed so that little to no mixing is required
- Seamless integration into the user-interface
