

Tone2 Cyber Genesis Soundset

Tone2 Audio has released Cyber Genesis, a soundset for their synthesizer-workstation Electra3. "Step into a digital genesis of sound with Cyber Genesis . a bold new Electra bundle crafted to elevate your electronic creations across all styles. Whether you're building pulsing techno landscapes, glitchy EDM grooves, atmospheric pads, or kinetic arpeggiated sequences, Cyber Genesis brings depth, drive, and futuristic motion."

Cyber Genesis is suitable for electronic music - from ambient, cinematic, and EDM, to techno, trance, synthwave, glitch, and dancefloor-bound patterns.

Highlights:

- 200 patches engineered for expressive performance: 76 arpeggiators, 124 gates.
- Expert sound design leveraging Electra's full synthesis power.
- Extensive modulation possibilities - mod wheel, velocity, aftertouch fully supported.
- All patches are carefully normalized for consistent volume and clarity.
- Seamless installation and integrated into the Electra UI.
- These aren't static samples - real dynamic patches with life, not just snapshots.

The price for Cyber Genesis is €39 / \$39 from Tone2 Audio.
