Tone2 Electra 3.3

Tone2 Audio has updated their multilayer-synthesizer-workstation Electra to version 3.3. The update is available for free for all Electra3 customers.

New Features:

- It is more easy to see Soundsets in the patch browser. They have blue color.
- The patch browser shows hints how the sounds should be used.
- Included two additonal sizes for the GUI: "Zoom 83% (1500 x 825)" and "Zoom 88% (1575 x 866)".
- Insert and Master effect parameters can be automated.
- Sustain of the envelopes can be automated.
- VST3 only installation for PC.

Enhancements:

- Better naming of Automation parameters.
- Slightly enhanced performance.

Fixes:

- Automation was not recorded properly in some DAWs if layer 2-4 was used.
- AmpSim does not longer output a tiny DC offset.
- Workaround for a bug of Windows 11 that messed up the layout of the font SeggoeUI.

Phoca PDF

- Fixed a typo in the word 'Subtractive'.
- Fixed a typo in 'Midi Chn'.

Electra 3.3 is downward compatible with all previous versions. All existing song projects and patches can be loaded without any further steps necessary. They will benefit from the enhanced sound-quality.
