Tone2 Hypersync

Dive into the pulsating universe of electronic sound with Hypersync for the Icarus 3 virtual synthesizer. Whether you're crafting driving EDM tracks, atmospheric pads, glitchy beats, or expressive arpeggios, Hypersync delivers interesting textures and movement.

Highlights:

- 202 patches meticulously designed for maximum expression:
- 41 arpeggiators: dynamic sequences ready to ignite your compositions.
- 161 gates: pulsating, syncopated patterns to energize your grooves.
- Expert sound design that fully exploits Icarus's powerful wavetable engine.

- Rich modulation possibilities - all the patches respond to mod wheel morphing the starting sound into a new evolving experience.
- Properly normalized for consistent volume and fidelity.
- Seamless installation and tight integration into the Icarus interface.
- These aren't just static samples - they're fully crafted sound designs with expressiveness and range.

The Hypersync soundset is suitable for the following genres: EDM, Techno, Trance, Dance, Electronic, Trap, Cinematic, Soundtrack, Film score, Hiphop, and a wide variety of other music genres. Hypersync takes full advantage of Icarus's 3D wavetable capabilities, offering evolving and dynamic sounds that breathe and pulse with your performance. With its focus on arpeggiator and gate-driven patches, this set is a go-to for producers seeking rhythmic complexity, movement, and freshness.

Price: \$39 / €39
