Tone2 Saurus 3.4

The update is available for free for all Saurus users. Please note that the AudioUnit interface of Saurus 3.4 is not downward compatible.

New features:

- Added a VST3 version for Mac (M1 native and Intel).
- Added a standalone version for Mac (M1 native and Intel).
- Completely new AudioUnit interface.

Enhancements:

- Several small enhancements.

Fixes:

- Automation in the VST3 version did not work with parameters that were located behind the 10th slot.
- Workaround for a bug of Ableton and FL Studio which did not display AudioUnits.
- Workaround for a bug of Reaper which did display automation parameters incorrectly.
- The AU version of Saurus 3.2 running in M1 mode could occasionally crash.
