Tone2 Saurus 4.1

Tone2 Audio has updated their analog synthesizer emulation Saurus to version 4.1. The update is free for anyone who owns Saurus.

Enhanced sound quality:

- Significantly enhanced sound quality when 44kHz is used as the DAW's samplerate. Reduced aliasing up to 12dB.
- Drastically enhanced sound quality in 88kHz is used as the DAW's samplerate. Reduced aliasing up to 20dB.
- Enhanced sound of the reverb. It has a smoother rolloff, less phasing, more detail and more depth.
- Slightly enhanced sound of the chorus. It has more precise interpolation.
- Slightly enhanced sound of the delay. It has more precise interpolation.

New features:

- It is more easy to see soundsets in the patch browser. They have blue color.
- Template patches have grey color in the patch browser.
- VST3-only installation has been added to the setup on PC.

Further enhancements:

- Enhanced look of the patch browser's scrollbar handle.
- More smart detection of the default installation path.

Phoca PDF

- Setup always selects full installation as a default.
- Better default values for the init patches.
- Many small improvements.

Fixes:

- Duplicate notes could not be triggered when the sustain pedal was pressed.
