

Tracktion Waveform Free 13.5

Tracktion Corporation announces the release of Waveform Free 13.5, the latest version of its award-winning, free digital audio workstation. Now benefiting from the same under-the-hood optimizations as its Pro counterpart, 13.5 delivers a smoother, more responsive user experience - dramatically improving workflow efficiency and reducing load times, especially for plugin-heavy projects.

Launched back in 2019, Waveform Free remains under continuous development and stays true to its name, being 100% free and completely unrestricted. It delivers studio-grade performance on Windows, macOS, and Linux and unlike other “Lite” or “Free” DAWs, with Waveform Free you’ll find:

- No track-count limits
- No timeouts or watermarks
- No export/render restrictions
- No third-party plugin limitations
- No saving or project constraints
- No copyright restrictions - your music is yours to share or sell

What you get is a highly creative, deep and flexible DAW that just happens to be free.

Packed with creative tools, effects, synths and instruments, Waveform Free 13.5 offers everything needed to take a project from initial idea to final mix. And with

support for VST, VST3, and Audio Unit formats, you can expand your sonic palette with an unlimited number of free plugins. As your musical journey evolves, Waveform Free can grow with you. Optional Feature Expansions unlock advanced capabilities - from DJ tools to professional video workflows - offering a cost-effective, clutter-free DAW tailored to your specific needs.

As leading audio software makers move their formerly free DAWs behind paywalls or feature caps, now is the perfect moment for creators everywhere to explore Waveform Free. Waveform Free is the only no-cost, no-strings-attached, cross-platform digital audio workstation built for musicians, producers, and podcasters who demand professional tools without compromise.
