Tracktion Waveform Free 2022

Tracktion Corporation has updated its award winning Waveform Free with a fresh new look and whole host of new and powerful additional features.

Waveform Free, the worlds only cross platform, unrestricted and fully featured free DAW is based on the essential features of Waveform Pro 12, renowned for its efficient workflow, streamlined user interface and its intuitive useability. There are no restrictions whatsoever in Waveform FREE: No timeouts, watermarks track count limits, export / render restrictions, 3rd party plugin restrictions, saving or project limitations and copyright restrictions. Waveform FREE is a highly creative, deep and flexible DAW ideal for podcasting, producing, recording or mixing music.

The new 2022 Waveform FREE has an entirely new browser offering tags, favourites and smart lists, with the same look and feel of Pro 12. It now has 15 Refreshed Audio Effects and 6 Super handy utility plugins - including a much requested convert to Mono tool and Spectrum analyser. The dedicated Actions Panel allows users to favorite their most used actions and create custom actions which can be recalled with the click of a button.

Waveform Free is a great way to start learning more about recording and production. It allows whole projects to be started and finished in the application without any add ins, and Editing, mixing and exporting are all incredibly intuitive and easy. For those looking to take their producing and creativity to the next level, Waveform Pro has the perfect selection of deep dive tools.
