

Bogren Digital Tue Madsen Signature IR Pack

Bogren Digital today releases the Tue Madsen Signature IR Pack, another addition to Bogren Digital's successful line of guitar cabinet impulse response collections for metal music creators.

Over the course of his 25 year long career as a music producer, Tue Madsen has worked with some of the biggest metal bands in the world, including Meshuggah, Behemoth, The Black Dahlia Murder, and many, many others. Tue has now created 31 impulse responses, using the same guitar cabinets, microphones, preamps and other equipment that he uses with his top-tier clients. The IRs are tailored for different styles and use cases.

Tue Madsen says: "You can expect a bunch of my cabinets collected through a life time recorded with my microphones of choice and signal chain and most importantly: My taste in sound. Also the IRs from the Kemper packs we put out earlier are included here."

The Tue Madsen Signature IR Pack is available immediately at Bogren Digital's webshop and select dealers. It will be available for only \$29.99 during the introductory period, after which it will be sold at its normal price of \$39.99.
