Universal Audio UAFX Guitar Amp Emulators

Universal Audio Inc. (UA), a company with expertise in audio production tools including the popular Apollo and Volt audio interfaces, UAD plug-ins, UA microphones, and UAFX guitar pedals, introduces UAFX Guitar Amp Emulators - three new stompboxes emulating the best vintage guitar amps of all time. Built upon powerful dual-engine processing and UAD audio modeling expertise, UAFX Guitar Amp Emulators feature stunning sonic authenticity to the original vintage amp.

UAFX Guitar Amp Emulators include:

- Dream '65 Reverb Amplifier - The essential American tube amp used by the Beatles, Muddy Waters, Elvis Costello, and countless others for more than 60 years.
- Ruby '63 Top Boost Amplifier - The iconic UK valve amp that defined the sound of the British Invasion, beloved by Queen, Radiohead, and U2.
- Woodrow '55 Instrument Amplifier - The legendary tweed tube amp that started it all, beloved by Neil Young, Chuck Berry, and The Eagles.

UAFX Guitar Amp Emulators capture the sound of the most iconic American and British tube guitar amps of the past 60 years. Designed for true tone heads, UAFX Guitar Amp Emulators give discerning guitarists multiple speaker and cabinet pairings, tube reverb and vibrato as found in the original amplifiers, custom boosts and circuit mods, and easy customization and additional features via the UAFX mobile app (iPhone/Android).

"When it comes to tone, guitarists are as discerning as they come," said Bill Putnam

Phoca PDF

Jr., CEO of Universal Audio. “We spared no expense in our multi-year effort to capture the sound of these amps, and knew we were done when we stopped talking and got lost in their sound.”

UAFX Guitar Amp Emulators allow users to personalize footswitches, save presets, and get the same tones used by pro guitarists including Tim Pierce, Nels Cline, Cory
