

UAD Topline Vocal Tune

Universal Audio Inc. (UA), a company with expertise in audio production tools, introduces UAD Topline Vocal Tune, a new native vocal pitch correction plug-in available for Mac and PC. Built for modern vocal production, Topline Vocal Tune gives musicians and producers the ability to pitch correct and reshape vocals instantly. With ultra-low-latency monitoring, singers can hear their vocals perfectly in tune through headphones without distracting delay.

"When singers feel good in their headphones, that's when great takes happen," says Julian Prindle, Senior Product Designer at Universal Audio. "Topline helps artists stay confident and in the moment while giving producers everything they need to shape vocals behind the scenes."

UAD Topline Vocal Tune Pricing:

- \$99 USD | Intro Price \$79 USD
- Included in UAD Spark Subscription

Topline Vocal Tune delivers pitch correction for every style of vocal production, from smooth and natural to the hard-tuned effects that define hip-hop, R&B, and pop.

Universal Audio introduces UAD Topline Vocal Tune Plug-In

Tuesday, 02 June 2026 12:15

Key Benefits:

- Ultra Low Latency. Hear pitched vocals without delay or performance disruption.
- Tuning for Any Genre. Turn a dial to go from subtle correction to hard-tuned effects.
- Natural Voice Settings. Preserve the nuance and character of performances.
- Shift Mode. Go beyond normal tuning with creative Pitch and Formant controls.
- MIDI Repitching. Turn vocals into an instrument to create melodic hooks and harmonies.
- Topline Key Finder. Automatically detect and lock to any key and scale.
- UAD Native Format. Available standalone or via UAD Spark plug-in subscription.

UAD Topline Vocal Tune is available through authorized UA retailers and at the website below starting June 2, 2026.
