

Vanguard Audio V24 Stereo Tube Condenser

In his May 2025 review for SoundOnSound, Sam Inglis noted: “Inspired by what is probably the greatest stereo valve mic ever made, the V24 is a labour of love that actually improves upon the original in some respects.... There’s no other microphone like it on the market - and only 800 or so mics like it anywhere in the world.”

The V24 features a pair of matched coincident BeesNeez CK12 Capsules and 9 polar patterns per capsule, you can utilize X/Y, Mid-Side, Blumlein, and other less conventional stereo microphone techniques in a single microphone. The V24

Vanguard Audio introduces the V24 Stereo Tube Condenser

features the acclaimed detented heavy-duty rotation mechanism, premium cryogenically-treated tube circuitry, Neutrik interconnects, US-made audiophile-grade resistors, twin Cinemag transformers, and a VLSM shockmount. The V24 is the first and last stereo microphone you'll ever need to reach for. Hand-made in small batches in the USA, this is the definitive modern tube stereo microphone and will be the crown jewel of any mic locker.
