Vienna MuseSounds Editions effortlessly bring the realism and emotional depth of Vienna Symphonic Library’s acclaimed orchestral virtual instruments to sheet music, allowing compositions to sound as vivid and nuanced as they appear on the page.

Recorded on the large Stage A of the company’s very own Vienna Synchron Stage, these libraries are shaped by the same acoustic environment used for major productions by Marvel, Disney, Netflix, Amazon MGM, and more, including Captain America: Brave New World, Ne Zha 2, The Rings of Power, American Fiction, Guardians of the Galaxy Vol. 3, Star Wars: The Acolyte, Mission: Impossible - Dead Reckoning Part One, Reacher, and many more. Captured with the same trusted Decca Tree setup used for these productions, all instrument and ensembles are expertly balanced and optimized for seamless playback in MuseScore Studio.
