

Voxengo SPAN Plus 1.22

Voxengo announces the release of SPAN Plus version 1.22 - an extended real-time “fast Fourier transform” audio spectrum analyzer plug-in for professional music and audio production applications. SPAN Plus is available in AAX, AudioUnit, VST, and VST3 plug-in formats, for macOS and Windows computers.

SPAN Plus is an extended version of the freeware SPAN plug-in: SPAN Plus provides several additional features such as PNG file export, real-time spectrum import/export, static spectrums display, and a “wide” spectrum display.

Changes in this version:

- Removed SSE3 requirement on Windows.
- Reduced visual tearing on Windows.
- Increased averaged spectrum calculation performance thus reducing time it takes to update the GUI.
- Improved spectrum averaging precision for $>1/3$ oct.
- Static spectrum's name is now assigned/changed on "Take" only if it is

currently "unnamed".

- Changed FFT analyzer's minimal averaging time to 5ms (down from 50ms).
- Changed static spectrum shift range to -42..42 dB (up from -32..32).
- Added a small delay to the "Max Crest Factor" estimation, to reduce over-reaction to transients at playback start
- Fixed a system DPI scaling-related VST3 GUI resizing issue in Cubase, on Windows.

SPAN Plus provides you with a very flexible "mode" system which you can use to setup your spectrum analyzer preferences. You may specify Fourier block size in samples, FFT window overlap percentage, spectrum's visual slope. Beside that you can choose to display secondary spectrum of a desired type (e.g. real-time maximum, all-time maximum). Spectrum can be smoothed out visually for an easier examination.

SPAN Plus supports multi-channel analysis and can be set to display spectrums from two different channels or channel groups at the same time. Spectrum's color can be chosen to taste.

SPAN Plus also features output level metering with adjustable ballistics and integration time, K-metering (including calibration K-metering). SPAN Plus displays level metering statistics, headroom estimation and clipping detection. Correlation metering is available as well.

SPAN Plus features:

- Real-time spectrum import/export
- PNG file export
- CSV spectrum file load/save
- Static spectrums display
- Output signal power statistics
- Spectrum smoothing
- User interface window resizing
- True peak and clipping statistics
- Correlation meter
- EBU R128 LUFS/LU metering
- K-metering
- Stereo and multi-channel analysis
- Mid/side analysis
- Internal channel routing
- Channel grouping
- Preset manager
- Undo/redo history
- A/B comparisons
- Contextual hint messages
- All sample rates support
- Retina and HighDPI support

Voxengo SPAN Plus 1.22 spectrum analyzer plugin released
