

VSL Big Bang Orchestra Update

The Vienna Symphonic Library announces free content expansions for two of its most popular Big Bang Orchestra Packs – BBO Tutti and BBO Riffs – alongside a limited-time sale featuring discounts on all 7 BBO Packs. The free expansions are available immediately to all existing users. Big Bang Orchestra is built for epic scoring – performance-ready recordings of the full orchestra and large sections, including tutti notes, chords, clusters, phrases, FX, and more. From thunderous brass and percussion to soaring strings, rich woodwinds, and angelic choirs, BBO delivers a vast universe of orchestral power.

With the new free expansions, two of the series' most powerful Packs grow even further: BBO Tutti receives new long chord performances, adding harmonic depth and sustain to its already powerful palette of tutti textures. BBO Riffs gains new cluster riff performances, expanding its rhythmic and textural range with bold, high-energy orchestral gestures that are equally at home in trailer music, action cues, and contemporary scoring. Registered users of BBO Tutti and BBO Riffs can update their products through the Vienna Assistant to get the new content for free.

To mark the occasion, Vienna Symphonic Library is offering significant discounts on all 7 Big Bang Orchestra Packs for a limited time. Whether completing a collection or discovering the BBO series for the first time, this is an ideal opportunity to bring the energy of a massive live orchestra into any production – at exceptional prices, starting at €65.

Big Bang Orchestra is Vienna Symphonic Library's collection of ready-to-use orchestral performance packs, designed for composers and producers working in film, TV, trailers, games, and beyond. The seven Packs – Tutti, Riffs, Strings, Woodwinds, Brass, Percussion, and Choirs – each capture a distinct orchestral color and texture, recorded on the legendary Stage A of Vienna Synchron Stage by the Vienna Synchron Orchestra, who have performed for major productions by Netflix, Disney, Marvel, Amazon MGM, and many others.
