Waldorf Music says Goodbye to Kyra

Waldorf Music says goodbye to one of the most powerful hardware-based virtual analog synthesizers. With its eight independent parts and the ability to play up to 16 voices per part, KYRA is a true multi-timbral talent. In 2019, Kyra saw the light of day and has since inspired many artists worldwide.

If synthesizer fans are fast enough they can get one of the last few devices with 10% discount including a Waldorf backback for free. For the set customers save more than 300 €. There are also a few units of KYRA Special Edition in seablue available.
