

Waves Audio Magma StressBox

Waves Audio, a developer of professional audio signal processing technologies and plugins, is expanding its custom-shop Magma series, with the release of the new Magma StressBox plugin, a transformative and expressive dynamics tool designed to shape musical tension and feel in real time. From intimate to explosive, all with a single knob. Whether you're battling flat, lifeless tracks or seeking to inject emotional lift into your mix, Waves' new Magma StressBox offers a powerfully musical solution. Traditional tools like EQ, compression, and saturation often fall short when it comes to translating feel. StressBox redefines that, transforming the way you shape emotion.

Magma StressBox gives you intuitive control over tension and feel in your mix, letting you shape emotion with ease. Turn right for aggressive compression that delivers punch, urgency, and in-your-face energy; turn left for cinematic depth - expansion that enhances transients, shortens reverb tails, and tightens your track for a more controlled feel. Each adjustment unlocks new sonic characters, from soft and spacious to bold and explosive, enabling dynamic movement between song sections. With Magma StressBox's automation capabilities, you can ride energy and emotion to create lift, contrast, and flow across verses, choruses, and instrumental parts, all in one streamlined tool.

Key Features of Waves Magma StressBox:

- Control the tension and feel of any musical source
- Injects life and drama into dull sources
- Endless combinations of sound within a single knob
- Add punch, urgency and size with compression
- Craft intimacy and tightness through expansion
- A deeply musical tool – no technical skills required
- Includes AutoGain for consistent output level
- One continuous knob: compression to the right, expansion to the left

For Black Friday only, Waves is offering Magma StressBox free of charge, a limited-time opportunity to add this transformative dynamics tool to your collection at no cost.

The Magma StressBox has been added to the Waves Ultimate plugin subscription which includes the comprehensive Waves plugin catalog (over 240 plugins) and Waves Essential (over 120 plugins) as monthly or annual subscriptions. It is also available for purchase (perpetual license) as a separate plugin, or within Waves' Mercury, Pro Show, SD7 Pro Show and Live Plus bundles.
