

WeissKlang V13 KlangFormer 2 & V13 Special Edition

WeissKlang is expanding the V13 ecosystem with two new releases: V13 KlangFormer 2, the second generation of its mic-modeling plug-in developed specifically for the V13, and the new V13 Special Edition, available for a limited time in a new black finish.

V13 KlangFormer 2 adds eleven distinct colorations and additional tone-shaping tools to the V13's linear, uncolored frequency response. The plug-in is available as a free download for all WeissKlang V13 owners. Developed entirely in-house by WeissKlang, V13 KlangFormer 2 brings software development and support closer together, giving the company greater control over support, new features and update cycles and enabling faster delivery of improvements.

The V13 Special Edition delivers the same technical and sonic performance as the standard V13, now presented in a new black finish. It is available until October 18, 2026, 11:59 PM CEST at a special price of EUR 349 (regular price: EUR 499), including free worldwide shipping.
