Zoom LiveTrak L6

The LiveTrak L6 is Zooms most compact and portable digital mixer / recorder. With 10-tracks of studio quality audio, effects, MIDI, and sound pads, it’s perfect for bands, synth players, live streaming, and more. Don’t let its size fool you. The L6 is designed with big mixer capabilities; full channel strip controls for each track including 3-band mid-sweepable EQ, aux sends, pan, and effects. The L6 records 10 discrete tracks plus the full stereo mix on an SD card up to 1TB. Share the live mix, or transfer your multi-track audio files to your favorite DAW for editing and mixing. With 32-bit float and pristine sounding preamps, you will get clip-free audio every time, without the need to set gain. Use four AA’s for up to 3 hours of power or an external USB battery for extended use:

Inputs:

- (INPUTS) 2 XLR/TRS combo inputs plus 4-stereo ¼” inputs.
- (MONO X2) Get two additional mono inputs instead of a stereo input.
- (USB RETURN) USB Audio Return for backing tracks and other audio from a laptop.

Outputs:

- (AUX OUTPUTS) Send custom mixes to monitors, effects, or external devices.

Phoca PDF

- (MAIN OUTPUTS) Connect to studio monitors or live speakers
- (HEADPHONE OUTPUT) Headphone output with volume control.

Enhance your mix with effects including Delay, Echo, and Spring, Room, and Hall reverbs. The L6’s main output compressor increases loudness while adding natural saturation. With 32-bit float, the audio will never clip, even at high volume. Connect, program, and sync the L6 to your outboard gear via the 3.5mm MIDI I/O, or to a computer via USB:

- Connect Outboard gear like drum machines and synths
- Map parameter controls such as volume, pan, and EQ to outboard gear
- Tempo synchronization with effects like delay

The L6 can be used as a 32-bit float 10-in / 4-out USB audio interface for your computer, iOS, or Android device while recording simultaneously to the SD card. It’s also a control surface for your favorite DAW. The L6 is the perfect companion for video streams that need broadcast quality audio no matter the location. Connect to your favorite streaming software on PC, Mac, iOS devices. Adjust levels and parameters quickly and precisely with the LED control knobs. Trigger pre-recorded backing tracks or samples using one of the four sound pads. You can also sample in real time for live jams and performances. The L6 Editor gives you access to settings and MIDI programming. Customize effect parameters, AUX send points, sound pad settings and more. Once you’ve dialed in your mix, save it to one of the three Scene memories for instant recall. The L6 is mountable to a standard Eurorack case using the optional ERL-6 rack ears and power supply.

Package includes:

- LiveTrak L6
- AD-17 USB AC Adapter
- USB-C Cable
