Animal Factory Asura

Animal Factory announces the Asura Compact Hybrid Polyphonic Synthesizer. Staying true to their unique approach and brand identity, AFA decided against adopting a conventional VCO-VCF architecture. In its place, the Asura explores the novel waveshaping possibilities offered by the interactions of polyphonic digital wavetables, a custom analog fuzz circuit and feedback loops - all of which are modulatable. With its mixture of innovation and flexibility, the Asura makes for an exciting addition to the compact desktop synth space.

Overview & Features:

- Hybrid: digital wavetables + analog fuzz
- Polyphony: 6 voices, 2 osc per voice
- Oscillators: factory + custom wavetables, optional 1op FM
- Fuzz: special custom circuit for waveshaping, distortion, tone control
- Play modes: 3/6 voice Poly / Unison / Chord / Arpeggiator
- Modulation: 2 LFOs, 2 Envelopes, 1 assignable Pressure Source
- Sequencer: 8-step sequencer with parameter lock, randomizer
- Delay: internal digital delay inspired by colorful hardware delays
- Editor: extensive web editor (VST editor planned)

Phoca PDF

- MIDI: complete control of all parameters via MIDI, TRS/USB-C
- I/O: Audio, Gate, Clock, v/Oct, 2xCV inputs
- Power: 12v 1A DC adapter / Internal high-quality headphone amp
