

Behringer BQ-10

The Behringer BQ-10 brings back the awesome power and simplicity of classic analog sequencing with a host of modern features that make it a perfect fit for your setup. The BQ-10 is a classic analog sequencer with 24 steps and full CV control in a Eurorack format.

Highlights:

- Single 16-step or double 8-step sequences
- Separate 8-step channel for controlling filter or amplitude on a connected synthesizer via CV
- Dedicated trigger outputs per step for shortening the sequences by connecting a step to the Reset input
- Trigger input for syncing with external clocks
