Best Service Eduardo Tarilontes Accordions 2

Collection brings back the unmistakable sound and soul of the accordion with unprecedented expressiveness. We have reissued Eduardo Tarilonte’s acclaimed library for the Engine Player with updated instruments, authentic playability, and the brand-new Folk Melodeon as a single instrument available for €/$49. The collection now includes ten carefully sampled instruments: classics like Accordion, Bandoneon, Concert Accordion and French Musette, plus characterful variants such as Folk Accordion, Steirisches Accordion, Concertina, Wooden Melodica, Bass Accordion and of course the brand-new Folk Melodeon.

Alongside sonic refinement and improved dynamics, Accordion, Folk Accordion, Concert Accordion and French Musette now also offer a fully playable bass and chord section with rhythmic accompaniment. All instruments run natively in the Engine Player - our modern platform for Engine Audio libraries. With fast loading times, an intuitive interface, and precise control over articulation, dynamics, and ambience, the Engine Player provides an inspiring environment for every musical idea. Accordions 2 - Collection is available now for €/$199.

If you already own a previous version - whether the Kontakt version (Accordions 1 or 2) or individual instruments - you can easily move up to the new Collection:
