

# EVE Audio EXO Series

EVE Audio announces the launch of the new EXO Series – four innovative nearfield monitors designed to meet the most demanding needs of modern studios. Whether compact or powerful, each model offers exceptional sound quality, refined design, and uncompromising performance. The EXO 24 is the ideal nearfield monitor for environments with limited space where sound quality cannot be compromised. Combining precision, compactness, and reliability, it delivers an outstanding listening experience in even the tightest spaces.

The EXO 25 stands out by merging ultimate precision with perceptible depth. It is the perfect monitor for those who need to hear every detail in their mixes with incredible clarity and spatial depth. With impressive sound pressure levels, linear performance, and complete reliability, the EXO 27 is the powerful all-rounder of the EXO series. It is designed to perform flawlessly in any studio environment, offering unmatched consistency and clarity.

The EXO 28 is the 2-way monitor flagship of the EXO series, delivering maximum power and precision for the most demanding productions. As the largest 2-way monitor in the EXO lineup, it sets new standards for sound reproduction and dynamic range.

### Key Features of the EXO Series:

- Newly developed EXO Precision AirMotion tweeter for ultimate precision
- GDC Waveguide (Guided Directivity Control) for wide, uniform dispersion
- CAL Woofer - Coated aluminum for low-end precision and minimal air resistance
- Precision and minimum air resistance as well as maximum dynamics thanks

to Air

- Stream Optimized Voice Coil Design
- Mounting option on the underside for all models
- Smart interface thanks to rear OLED display with SMART Control Knob for intuitive operation
- The illuminated logo on the front serves as a multi-colour status display
- Low-diffraction design with curved panels and rounded edges reduces diffraction effects and ensures clear imaging
- EVE Control software application enables the management of all monitors via one interface. The software will be released soon!
- Analog XLR and RCA input and S/PDIF digital in/out (192kHz/24bit)
- Safe fade-in of the audio signal to avoid level peaks
- High-resolution A/D converter, powerful DSP and low-distortion amplifier
- Powerful power supply for exceptional dynamics
- 5-year extended manufacturer's warranty available

The EXO Series represents the culmination of years of research and development, offering audio professionals an unparalleled listening experience. Whether you're mixing, mastering, or creating, these monitors ensure precision, clarity, and the power you need to bring your music to life.

The EXO Series is expected to be available from June 2025. Carried list prices are 479 € for EXO 24, 589 € for EXO 25, 699 € for EXO 27, 949 € for EXO 28.
