

iLoud Micro Monitor Pro Immersive Bundle 11

IK Multimedia announces the iLoud Micro Monitor Pro Immersive Bundle 11 release, now shipping from IK's online store and select dealers. This brand-new offering incorporates IK's latest addition to the iLoud monitor line-up, the Micro Monitor Pro, and provides the most cost-effective and versatile monitoring solution for anyone interested in immersive audio.

With its ultra-compact size, super lightweight design, and pro-quality performance, the Micro Monitor Pro is an immersive monitor setup that offers superior sound for this price and form factor. Ideal for mixing and mastering rooms that are space-confined or home studios that want to experience spatial audio in their own space, the iLoud Micro Monitor Pro Immersive Bundle 11 brings immersive ability to anyone without breaking the bank.

The Immersive Bundle 11 includes 11 iLoud Micro Monitor Pro units and an ARC measurement microphone for precise room calibration. The versatile base design includes threaded inserts for mounting on mic stands, making setup fast and easy. An optional iLoud wall/ceiling mount is also available for optimal placement.

Key Features:

- **Light and Easy to Hang:** Each monitor weighs approximately 3 lb./1.4 kg, making it ideal for installation in tight workspaces. Threaded inserts at the bottom make for easy stand placement to use anywhere.

IK Multimedia launches the iLoud Micro Monitor Pro Immersive Bundle 11

Thursday, 10 October 2024 18:11

- **Powerful Performance:** Featuring 550-watt RMS in total, custom-designed drivers, and a maximum SPL of over 95 dB per speaker. It also has selectable LF from 50 to 80 Hz for use with subwoofers.
- **Advanced DSP:** Delivers near-perfect phase alignment, time coherence, and a flat frequency response for unparalleled accuracy.
- **Built-in ARC Self-Calibration:** Instantly adjusts to any environment, ensuring consistent sound quality.
- **X-MONITOR Software Integration:** Provides complete control over speaker parameters and emulates the voicing of other top studio monitors.

With a frequency response of 50 Hz to 20 kHz (± 2 dB), the iLoud Micro Monitor Pro ensures transparent, true-to-life sound without hype or coloration. The built-in ARC room correction technology optimizes the monitors for any space, delivering superior results wherever you work.

The iLoud Micro Monitor Pro Immersive Bundle 11 (with ARC mic) is now available from IK Multimedia's online store and select dealers. Visit the store for more information or to place an order.
