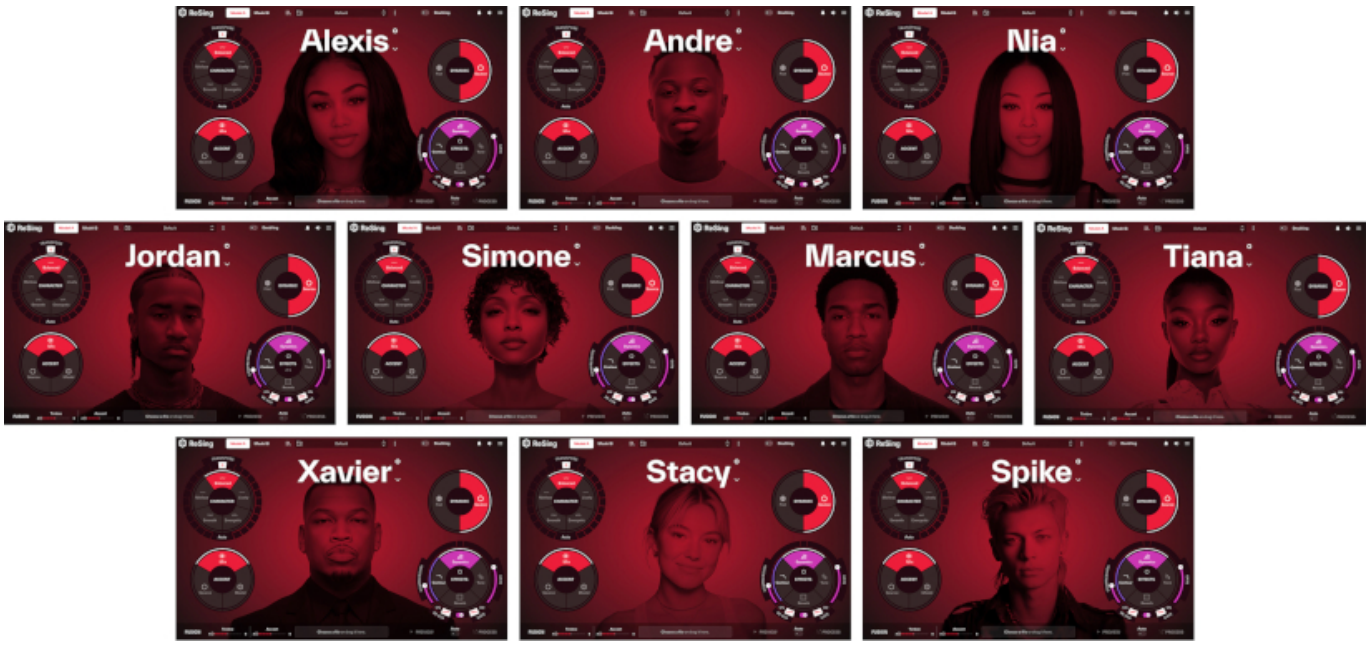
IK Multimedia ReSing Voices Vol 2 Producer's Pack



IK Multimedia releases ReSing Voices Vol 2 Producer's Pack, adding 10 new English-language singer models to the rapidly expanding ReSing platform. Designed for modern music production, the collection gives producers more ways to transform existing performances and explore new creative directions. Vol 2 arrives as part of ReSing's broader evolution. Since the first Producer's Pack launched earlier this year, ReSing has grown into a creative ecosystem built around artist collaboration and an expanding marketplace of professional voices.

ReSing Voices Vol 2 Producer's Pack features 10 new English-language singers spanning pop, R&B, soul, gospel, rap, trap, rock, EDM, and more. From intimate and expressive to soulful, energetic, and powerful, the collection gives modern producers more options for finding the right vocal character for any track. All 10 voices work seamlessly in ReSing, letting producers reinterpret existing performances, experiment with different singers, and explore new creative directions without altering the original vocal performance.

ReSing is IK's voice production platform that lets producers transform existing vocal performances using professionally created voice models. Keep the original melody, timing, phrasing, and emotion while changing the singer, opening new creative possibilities without re-recording. It solves common production challenges, from finding the right voice for a song to creating convincing demos, replacing guide vocals, adapting productions for different singers and languages, and building richer vocal arrangements.

In addition to Vol 2, producers can access its individual singers through the ReSing

Phoca PDF

Singer Showcase, where they can discover and permanently license professional voices with a simple one-time purchase. Participating artists are fairly compensated, and IK Multimedia continues to invite professional singers and vocal artists interested in joining the growing ReSing ecosystem to apply. Join ReSing

ReSing Voices Vol 2 Producer's Pack is available now as a standalone purchase and is not included in ReSing MAX. For the first 30 days, it's available at an introductory price. Individual voices from the pack are also available through the ReSing Singer Showcase. The pack works with all paid versions of ReSing. Users who update ReSing to the latest version will see the new voice models in the ReSing library and can purchase the pack through the IK Multimedia online store or authorized dealers.
