

Klevgrand Stark 1.2 with Brusfri

Klevgrand releases a big update to its signature amp and effects modeling plug-in Stark. Released in 2019 for both desktop and iOS (app of the year), Stark is today an established and go to plugin for thousands of users worldwide. A version of Brusfri, Klevgrand's highly advanced audio noise reducer is now an integrated part of the overall Stark plugin experience – With a simple push of the Ear – you instantly reduce your background noise.

New additions to the Pedal board:

- Spinner: Rotary speaker – great for adding movement in the stereo field.
- Reverb+: An extremely powerful new reverb that lets you blend early and late reflections.
- Envelope filter: Dynamic filter that creates anything from subtle modulation to tone shifting wah sounds.

Also added to this new version of Stark are 30 new, finely tuned presets, for a variety of styles like Beach House, Indie, Shoegaze and more – making it more versatile than ever. The new version of Stark will be priced at \$99.99. On sale for \$49.99 until 2025-07-22.
