

TONE2 Audio Electra 2.11

Tone2 Audio has updated Electra to v2.11. The update is available for free for all Electra2 users.

New features:

- Added a VST3 version for Mac (M1 native and Intel).
- Added a standalone version for Mac (M1 native and Intel).
- Completely new AudioUnit interface.
- AU and VST3 version display the layer of the automation parameter.
- The installer of the PC version automatically detects the path of a previous installation to avoid duplicates.
- The VST3 version now comes with mousewheel support for all DAWs on PC.

Enhancements:

- Many small enhancements.

Fixes:

- Workarounds for many DAWs which did not resize the VST3 plugin properly.
- Automation in the VST3 version did not work with parameters that were located behind the 10th slot.
- Workaround for a bug of Ableton and FL Studio which do not properly stick to the AudioUnit2 standard and did not display the AudioUnit.

TONE2 Audio releases Electra 2.11

Monday, 17 October 2022 10:28

- Workaround for a bug of Reaper which did display automation parameters incorrectly.
- Compatibility fix for Ableton which did not record the automation of knobs from layer2-4 correctly.
